

POWER ENGINEERING

&

MINING SERVICES Pty Ltd

ABOUT US

Power Engineering situated in Kempton Park has been proudly in operation for over a decade. Over the years the company has become specialists in a wide range of hydraulic based equipment. We are dedicated to provide you with comprehensive solutions in repairs, manufacturing and turnkey projects.

It was the initial focus of the company to create a fully equipped service team to specialize in all types of earthmoving and mining equipment.

With the experience and knowledge achieved we soon found ourselves servicing and repairing a large variety of hydraulic lifting & scrap yard equipment, providing hydraulic repair work and general engineering for a number of large groups in this specific industry.

Seeing the need for quality and cost effective services in the hydraulic lifting and recycling industry we are now committed to quality design, refurbishment and repair work for all scrapyards, recyclers and transportation companies using lifting equipment.

With a workshop of a 1000m² and a paved yard of an additional 900m² we are well equipped for handling large equipment. Having a dedicated staff and boasting a Managing Member & Workshop Foreman who have together accumulated over 60 years' experience in a variety of lifting and hydraulic based equipment allowing us the confidence in the services we provide.
